

TEODOR VALCHEV

Full-Stack Software Developer | C# · .NET · TypeScript · React

Email: teo.valchev@gmail.com | LinkedIn: [linkedin.com/in/teodor-valchev](https://www.linkedin.com/in/teodor-valchev) | Phone: 0887 591 881 | Location: Sofia, Bulgaria

SUMMARY

Full-stack Software Developer with ~2.5 years of experience across C#/.NET Core backends (Entity Framework, LINQ, SQL Server), TypeScript/Node.js APIs (NestJS, PostgreSQL), and React/JavaScript front ends, plus enterprise system integrations (PLM/ERP-SAP) and automated testing. Works in Agile/Scrum teams using Git/Gitflow and Docker.

SKILLS

Backend (.NET): C#, .NET Core, Entity Framework, LINQ, SQL Server, REST API design

Backend (Node.js): Node.js, TypeScript, NestJS, PostgreSQL, NoSQL

Frontend: React, JavaScript (ES6), TypeScript, CSS

Integrations & Testing: PLM/ERP-SAP integration, data migration tooling

Practices & Tools: Docker, Git/Gitflow, Agile/Scrum, code reviews

LANGUAGES

English (C1) · German (B2, DSD certificate) · Bulgarian (Native)

EXPERIENCE

Software Developer — Inensia, Sofia, Bulgaria

03/2026 – 09/2026

- Designed and built interfaces between a PLM system and SAP ERP, plus front-end and back-end PLM customizations in C#, JavaScript, and SQL, improving cross-system data flow.
- Developed internal migration tools to load legacy data into the PLM system
- Turned functional specifications from cross-functional teams into working technical solutions.

Software Developer — Future-proof Software, Sofia, Bulgaria

12/2024 – 03/2025

- Developed responsive React and TypeScript web applications; maintained code quality through code reviews and testing.
- Built RESTful APIs and backend logic with NestJS and TypeScript on PostgreSQL, including data modeling, queries, and performance tuning.
- Worked with designers and backend engineers to streamline integration workflows and improve delivery speed.

Software Developer — Merkle EMEA, Sofia, Bulgaria

04/2022 – 11/2023

- Built backend components in C# on .NET Core using Entity Framework, LINQ, and SQL Server, improving processing efficiency and API responsiveness.
- Implemented features and fixed critical bugs in JavaScript on Salesforce projects, contributing to smoother releases.
- Presented feature demos to customers and documented deliverables, clarifying requirements across teams.

PROJECTS

Pure Gym — [deploy-react-pure-gym.web.app](#)

- Built a React application consuming a REST API, with a catalog of items, detailed item views, and user comments.
- Implemented user authentication and full CRUD functionality, covering the complete data lifecycle.

EDUCATION

University of Plovdiv "Paisii Hilendarski" — Plovdiv, Bulgaria

09/2022 – 07/2026

- Software development, algorithms, and information systems, completed part-time while working.

Software University (SoftUni) — Sofia, Bulgaria

10/2022 – 09/2024

- Intensive full-stack program covering front end, back end, databases, and deployment, with hands-on projects.

Language School "Prof. Dr. Zlatarov" — Haskovo, Bulgaria · DSD B2

09/2015 – 07/2019
